Summary

Results-driven software developer with 5+ years of experience designing and building scalable, high-performance backend systems, APIs, and cross-platform mobile applications. Proven track record of delivering 5+ production mobile apps and 5+ backend services. Highly proficient in Node.js, Express.js, Django, Flutter, and React Native, with deep expertise in RESTful and event-driven microservice architectures, database design (PostgreSQL, MongoDB, MySQL), authentication systems, and real-time communication using WebSockets and Redis.

Proven ability to deliver secure, efficient, and resilient backend solutions that power modern mobile and web applications.

Technical Skills

- **Programming Languages:** Python, JavaScript and TypeScript, Dart
- **Mobile & Web Frameworks:** Flutter, React Native, Express.js, Next.js, Django
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase Firestore, Redis, GraphQL
- **Cloud & DevOps:** AWS, Firebase, cPanel, Docker
- **Tools & Technologies:** Git, Figma, Code Review, Automated Testing
- **Soft Skills:** Leadership, Analytical & Creative Thinking, Problem Solving, Effective Communication, Team Collaboration

Work Experience

Softon Digital Limited: ***Senior Mobile/Backend Developer*** | Nov 2024

- Led development of scalable, modular codebases using clean architecture and reusable components improving development efficiency by 100%.
- Guided implementation of design patterns and API integrations across frontend and backend teams. Ensured pixel-perfect UI delivery from Figma designs across devices. Mentored developers, accelerating onboarding and team productivity.

Bom Drive: ***Senior Software Developer (Contract)*** | Mar 2024 – Dec 2024

- Designed and implemented a salary advance system using TypeScript and Express.js, enabling early wage access and improving workplace focus by 50%.
- Led development of BomPay – a fintech mobile app supporting utility payments and money transfers – and a transport booking application to enhance payment workflows.
- Oversaw Flutter-based cross-platform development, ensuring smooth performance and intuitive UX.
- Collaborated with engineers to manage server setup and configuration, supporting backend reliability, high availability, and smooth deployment pipelines.

Tingo Mobile: ***Flutter Developer*** | *Jun 2022 – Feb 2024* | *Full-Time*

- Built a reusable Flutter package for seamless TingoPay payment gateway integration.

- Improved user conversion by 15% through optimized UI/UX design. Collaborated with backend teams to align API architecture with mobile workflows. Developed a real-time notification system using Express.js and TypeScript, improving system responsiveness and internal efficiency.

GIIT: ***Software Engineer & Head of Instructor*** | 2018 – 2022 | Full-Time

- Managed a team of instructors, driving course development and timely delivery of software training.
- Trained 1,000+ students in web and mobile app development. Delivered client projects with focus on user experience, performance, and secure architecture.
- Collaborated across teams to ensure high-quality, budget-aligned results.
- Developed client-facing mobile applications, focusing on seamless user experience, optimized performance, and secure architecture.

Technical Projects

Softon Solutions – PlayBeta App & Dashboard
Lead Engineer | Django, Redis, PostgreSQL, Sentry, React, React Native.
Led end-to-end development of the PlayBeta platform, including a React Native mobile app and React-based admin dashboard. Architected backend with Django and Redis for performance and integrated Sentry for error monitoring.

Project link: View Project

BomPay – Salary Advance & Mobile App
Lead Engineer | Nodejs, Redis, PostgreSQL, React Native.
Designed a salary advance system enabling partial wage access, built with TypeScript, Express.js, and PostgreSQL.
Integrated core features in BomPay mobile app (Flutter, Firebase, REST APIs), improving transaction speed and user satisfaction across platforms.

Project link: View Project

BritEdge – A Payment Solution
Mobile Developer | Flutter, Firebase, REST API, Express, GetX, Provider
Built the TingoPay user-facing app (Flutter, Firebase, Express.js), focusing on performance, responsive UI, and secure API integration for payments and account management.

Project Link: GooglePlay

TingoPay App
Mobile & Backend Developer | Flutter, Firebase, REST API, Express, GetX, Provider
Built the TingoPay user-facing app (Flutter, Firebase, Express.js), focusing on performance, responsive UI, and secure API integration for payments and account management.

Education

Bachelor of Science: Computer Science
ESCT Benin | 2022

Diploma: Software Development
Global Innovative Information Technology | 2018
